Molecular Cell Research
including Hormone and
Neurotransmitter Action
Vol. 1094, 1991

Cumulative Contents

Regular Section

Regular Papers

Induction of differentiation of human myeloid leukemia HL-60 cells by novel pyrimidine nucleoside analogs
M. Makishima, Y. Honma, M. Hozumi, K. Sampi, M. Hattori, I. Ishikawa, H. Ogura, N. Kawahara, T. Kanaiwa and K. Motoyoshi (Japan) 1

Production of gelatin-degrading matrix metalloproteinases ('type IV collagenases') and inhibitors by articular chondrocytes during their dedifferentiation by serial subcultures and under stimulation by interleukin-1 and tumor necrosis factor α
V. Lefebvre, C. Peeters-Joris and G. Vaes (Belgium) 8

Cation selective channel in fetal alveolar type II epithelium
B.A. Orser, M. Bertlik, L. Fedorko and H. O'Brodovich (Canada) 19

Effects of azumolene on doxorubicin-induced Ca^{2+} release from skeletal and cardiac muscle sarcoplasmic reticulum
Q. Tian, A.M. Katz and D.H. Kim (U.S.A.) 27

Membrane gangliosides modulate interleukin-2-stimulated T-lymphocyte proliferation
F.J. Sharom, A.L.H. Chiu and J.W.K. Chu (Canada) 35

Biosynthesis of platelet activating factor and 1-*O*-acyl analogues by endothelial cells
K.L. Clay, C. Johnson and G.S. Worthen (U.S.A.) 43

Relationship between total magnesium concentration and free intracellular magnesium in sheep red blood cells
H. Fujise, P. Cruz, N.V. Reo and P.K. Lauf (U.S.A.) 51

Molecular characteristics of cytochrome b_{558} isolated from human granulocytes, monocytes and HL60 and U937 cells differentiated into monocyte/macrophages
C. Capeillere-Blandin, A. Masson and B. Descamps-Latscha (France) 55

Subsection

Minireview

Intrasteric regulation of protein kinases and phosphatases
B.E. Kemp and R.B. Pearson (Australia) 67

Regular Papers

Differences in phorbol ester-induced decrease of the activity of protein kinase C isozymes in rat hepatocytes
M. Robles-Flores, R. Alcántara-Hernández and J.A. García-Sáinz (Mexico) 77

Phorbol ester, prolactin, and relaxin cause translocation of protein kinase C from cytosol to membranes in human endometrial cells
S.S. Kalbag, M.S. Roginsky, Z. Jelveh and S. Sulimovici (U.S.A.) 85

Insulin and phorbol ester stimulate phosphorylation of a 15 000 dalton membrane protein in rat diaphragm in a similar manner
O. Walaas, R.S. Horn and S.I. Walaas (Norway, U.S.A.) 92

Effects of steroidal and non-steroidal antiandrogens on the androgen binding properties of the rat ventral prostate androgen receptor
J. Steinsapir, G. Mora and T.G. Muldoon (U.S.A.) 103

Determination of endogenous levels of cyclic ADP-ribose in rat tissues
T.F. Walseth, R. Aarhus, R.J. Zeleznikar, Jr. and H.C. Lee (U.S.A.) 113

The antioxidant butylated hydroxytoluene stimulates platelet protein kinase C and inhibits subsequent protein phosphorylation induced by thrombin
M. Ruzzene, A. Donella-Deana, A. Alexandre, M.A. Francesconi and R. Deana (Italy) 121

The use of phosphopeptides to distinguish between protein phosphatase and acid/alkaline phosphatase activities: opposite specificity toward phosphoseryl/phosphothreonyl substrates
A. Donella-Deana, H.E. Meyer and L.A. Pinna (Italy, F.R.G.) 130

Report

Corticosteroid effects on lipid lateral diffusion in CEM-C1 and CEM-C7 acute lymphoblastic leukemia cells
C.J. Bulva, J. Printen, G. Melnykovych, L. Cutts, B.G. Barisas and D.A. Roess (U.S.A.) 134

Regular Section

Regular Papers

Evidence for coupling of bradykinin receptors to a guanine-nucleotide binding protein to stimulate arachidonate liberation in the osteoblast-like cell line, MC3T3-E1
F. Yanaga, M. Hirata and T. Koga (Japan) 139

Absolute quantification of ^{31}P muscle metabolites using NMRS with an internal standard and a high-Q, double-tuned coil
E. De Bisschop, G. Annaert, R. Luypaert, J. Coremans and M. Osteaux (Belgium) 147

Effect of rat plasma high density lipoprotein with or without apolipoprotein E on the cholesterol uptake and on the induction of the corticosteroid biosynthetic pathway in newborn rat adrenocortical cell cultures
M. Hammami, S. Meunier, G. Maume, P. Gambert and B.F. Maume (France) 153

Phospholipid metabolism and prostacyclin synthesis in hypoxic myocytes
H. Kawaguchi, M. Shoki, K. Iizuka, H. Sano, Y. Sakata and H. Yasuda (Japan) 161

Subsection

Minireview

Molecular basis of signal integration in phosphorylase kinase
L.M.G. Heilmeyer, Jr. (F.R.G.) 168

Regular Papers

Effect of different steroidogenic stimuli on protein phosphorylation and steroidogenesis in MA-10 mouse Leydig tumor cells
L.R. Chaudhary and D.M. Stocco (U.S.A.) 175

ZK98299, a novel antiprogesterone that does not interact with chicken oviduct progesterone receptor
V.K. Moudgil, R. Nath, A. Bhakta and M. Nakao (U.S.A.) 185

Analysis by mRNA levels of the expression of six G protein α-subunit genes in mammalian cells and tissues
J.L.R. Garibay, T. Kozasa, H. Itoh, T. Tsukamoto, M. Matsuoka and Y. Kaziro (Japan) 193

Glucose: a more powerful modulator of fructose 2,6-bisphosphate levels than insulin in human hepatocytes
M.P. López, M.J. Gómez-Lechón and J.V. Castell (Spain) 200

Transforming growth factor beta stimulates the production of the tissue inhibitor of metalloproteinases (TIMP) by human synovial and skin fibroblasts
J.K. Wright, T.E. Cawston and B.L. Hazleman (U.K.) 207

p34cdc2 phosphorylation sites in histone H1 are dephosphorylated by protein phosphatase $2A_1$
M.M. Sola, T. Langan and P. Cohen (U.K., U.S.A.) 211

Insulin-like action of catecholamines and Ca^{2+} to stimulate glucose transport and GLUT4 translocation in perfused rat heart
S. Rattigan, G.J. Appleby and M.G. Clark (Australia) 217

Hormonal effects on the sulfhydryl groups associated with intestinal brush border membrane proteins
N. Tolosa de Talamoni, H. Mykkanen, Q. Cai and R.H. Wasserman (U.S.A.) 224

Cholecystokinin receptor occupation and cholecystokinin-induced calcium mobilization in the early phase in rat pancreatic acini
T. Kusui, S. Sato, S. Katsushima, T. Honda, C. Shigeno and J. Konishi (Japan) 231

A guanine nucleotide-binding protein mediates 1,25-dihydroxy-vitamin D-3-dependent rapid stimulation of Ca^{2+} uptake in skeletal muscle
A.R. De Boland, M. Flawia, O. Coso and R. Boland (Argentina) 238

Rapid Report

Phorbol ester induces phosphorylation and down-regulation of connexin 43 in WB cells
S.Y. Oh, C.G. Grupen and A.W. Murray (Australia) 243

Corrigendum 247

Regular Section

Regular Papers

Activation of intracellular calcium-activated neutral proteinase in erythrocytes and its inhibition by exogenously added inhibitors
M. Hayashi, M. Inomata, Y. Saito, H. Ito and S. Kawashima (Japan) 249

Deoxyadenosine triphosphate acting as an energy-transferring molecule in adenosine deaminase inhibited human erythrocytes
K. Nakashima, H. Nakashima and M. Shimoyama (Japan) 257

Evidence for the involvement of endogenous thymidine in the density-inhibition of tumorigenic Chinese hamster V79 cells
S. Nakano, T. Koga, I. Ichinose, H. Yamada and Y. Niho (Japan) 263

Evidence for direct coupling of primary agonist–receptor interaction to the exposure of functional IIb–IIIa complexes in human blood platelets. Results from studies with the antiplatelet compound ajoene
R. Apitz-Castro, M.K. Jain, F. Bartoli, E. Ledezma, M.-C. Ruiz and R. Salas (Venezuela, U.S.A.) 269

Changes of lysosomal proteinase activities and their expression in rat cultured keratinocytes during differentiation
H. Tanabe, N. Kumagai, T. Tsukahara, S. Ishiura, E. Kominami, H. Nishina and H. Sugita (Japan) 281

Factors influencing variable oxidative hemolysis of inbred mouse erythrocytes
W.C. Kruckeberg (U.S.A.) 288

Subsection

Minireview

The actions of cyclic AMP on biosynthetic processes are mediated indirectly by cyclic AMP-dependent protein kinase
P. Cohen and D.G. Hardie (U.K.) 292

Regular Papers

Regulation of glucose transport in Clone 9 cells by thyroid hormone
A.K. Kuruvilla, C. Perez, F. Ismail-Beigi and J.N. Loeb (U.S.A.) 300

Priming action of inositol hexakisphosphate ($InsP_6$) on the stimulated respiratory burst in human neutrophils
P. Eggleton, J. Penhallow and N. Crawford (U.K.) 309

Regulation of type I plasminogen activator inhibitor synthesis by protein kinase C and cAMP in bovine aortic endothelial cells
S.R. Slivka and D.J. Loskutoff (U.S.A.) 317

Platelet activation by diacylglycerol or ionomycin is inhibited by nitroprusside
M.G. Doni, R. Deana, E. Padoin, M. Ruzzene and A. Alexandre (Italy) 323

Potentiation of the activity of mouse liver-derived HBGF-1-like growth factor by heparin and dithiothreitol: evidence for the involvement of a plasma factor
T. Nagasaki and M.A. Lieberman (U.S.A.) 330

Phytoestrogens: new ligands for rat and human α-fetoprotein
B. Garreau, G. Vallette, H. Adlercreutz, K. Wähälä, T. Mäkelä, C. Benassayag and E.A. Nunez (France, Finland) 339

Inhibition of depolarisation-induced calcium influx into GH_3 cells by arachidonic acid: the involvement of protein kinase C
D.J. MacEwan, R. Mitchell, F.J. Thomson and M.S. Johnson (U.K.) 346

Modulation of the exocytotic reaction of permeabilised rat mast cells by ATP, other nucleotides and Mg^{2+}
T.H.W. Lillie, T.D. Whalley and B.D. Gomperts (U.K.) 355
